

Lifespan Human Development: Local Community College Courses

Community College	Course Name	Units	Lecture/Lab?	Notes
Diablo Valley College <i>Pleasant Hill, CA (51 miles)</i>	PSYCH 200: Life Span Development This course examines the developmental changes and sociocultural events that take place during an individual's life span from conception to death. Students are introduced to the psychological characteristics, personal or social developmental problems and opportunities for each of life's age periods. Students are also exposed to classic and contemporary theories and research (including the role of heredity and the environment) in the area of human development. Life stages will be viewed in terms of a variety of theoretical frameworks that address the following domains of human development: physical, cognitive, social and personality.	3 semester units 4.5 quarter units	Lecture	Prerequisites: None
Los Rios Community College District <i>Includes:</i> American River College <i>Sacramento, CA (26 miles)</i> Consumes River College <i>Sacramento, CA (26 miles)</i> Folsom Lake College <i>Folsom, CA (40 miles)</i> Sacramento City College <i>Sacramento, CA (19 miles)</i>	PSYC 370: Human Development: A Life Span This course examines human development across the lifespan, from conception through death, by focusing on the main domains in developmental psychology (physical, cognitive, and socio-emotional) as well as the interaction among these domains. It emphasizes development as an on-going process, with an effort to encourage the practical application of the knowledge acquired. This course is designed to provide a foundation for careers in educational, social, psychological, and medical fields as well as a better understanding of one's own developmental process.	3 semester units 4.5 quarter units	Lecture	Prerequisites: None
